FIG. 1 is a cross-sectional view of a circular device. The device has a central circular component (101) surrounded by a ring (102). The ring is divided into four quadrants by four radial arms (105). Each quadrant contains a circular element (105) and a rectangular element (107). The outermost layer is labeled 110. Various other components are labeled with numbers 101 through 128. Section lines A-A are indicated.

FIG. 1 is a schematic diagram of a mechanical assembly. A central gear-like component (1006) is mounted on a shaft (1007) within a housing (1001). The gear has teeth (1005) and a central hub (1002). A dashed line (1004) indicates a cross-section or internal feature. A curved surface (1003) is adjacent to the gear. A label 1008 points to a boundary line.
